Organic Certification	FVOPA

### TOP 5 TERPENES

**Organic Mint Chocolate Chip** is a perfectly balanced hybrid consisting of equal parts sativa and indica. The dense, resin-laden buds are packed with a unique and rich herbaceous aroma that exude a certain skunkiness when broken open. Notes of cool mint and subtle chocolate become more apparent when the flower is combusted making for a smooth smoke that finishes with a slight tang on the exhale.

The high comes on quickly and can be a potent motivator. Energetic and clear, the effects can help focus the mind while grounding the body in a level of relaxation that trends towards the more sedate as time passes. With a number of positive mental and physical benefits reported by users, Mint Chocolate Chip is a highly versatile strain that will readily appeal to a diverse selection of people on both solo and social ventures.

EastCann dried flower is packaged in nitrogen-purged, food grade, recyclable cans. This type of packaging utilizes a purge of nitrogen and hermetic seal to maintain freshness and preserve the dried flower quality and terpene profile.
